

The explosive growth of the Internet has driven increased dependency on public and private access to it. End users expect immediate access to information, forms, videos and news outlets among many other data sources. Quality, quantity and speed of content delivery has moved to the forefront on the list of issues providers need addressed immediately.

**FOR YOUR
content**

NETWORK SOLUTIONS

The computing power you need for your team
PERFORMANCE –

Provides the performance level necessary to deploy computing solutions quickly and cost effectively

QUALITY –

You use carrier managed equipment and network stored in manned facilities that are monitored 24 X 7

SECURITY –

Secure storage of data guaranteed

AVAILABILITY AND SCALABILITY –

Ensuring availability during peak traffic usage and scalable enough to handle the traffic efficiently

CLOUD COMPUTING CENTRIC –

Building towards the cloud distribution model significantly reducing core infrastructure procurement and maintenance costs

FEATURES & SUPPORT

ADMINISTRATION – You don't need to manage any of the procurement, installation or maintenance of services

FLEXIBILITY/SCALABILITY- Performance levels and space requirements can be scaled to meet any business need

PASS THROUGH SLA – iBandwidth delivers the same SLA guarantees by Service Guide to the underlying providers you would be entitled to if negotiating directly.

INDUSTRY STANDARD INSTALLATION INTERVALS – All installations are completed in industry standard intervals given standard conditions. With iBandwidth white glove project management support, your installation will be well documented and well communicated, insuring your goals are met within committed timeframes, and your satisfaction is assured.

**“We
Don't
Just Sell
Network,
we
Provide
Solutions**

**Access to the edge = better
experience for the user**

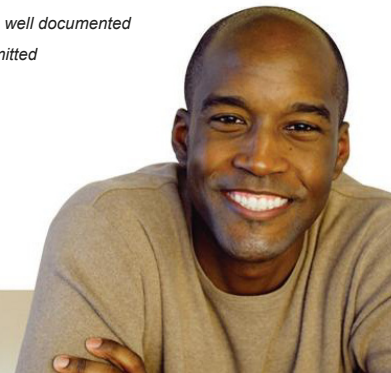

A robust Content Delivery Network Solution from iBandwidth will allow you to provide end users access to edge devices with stored information to decrease bottlenecks at origin storage locations during peak traffic spikes. You can give your eyeballs the access and speed they require without the expense of maintaining massive network facilities to avoid latency issues.

Our premier CDN partners provide all the infrastructure of edge and mid-tier servers you need to get content delivery closer to the user. Together with our IP Transit and Point to Point products iBandwidth CDN solutions can give you the access to the content resources you need in one convenient package.

SECURITY AND DIVERSITY

- Cache and Download Arrangements
- Document Storage Solutions
- Network Management Solutions
- Video On-Demand
