FEATURES & SUPPORT

ACCESS TO BETWEEN 30-400 CARRIERS - iBandwidth through it's partner arrangements, can offer connectivity to multiple carriers in data centers around the world, cost effectively. Whether you are interested in direct collocation or access to virtual collocation through hops across dark fiber iBandwidth can get you to the carriers you need.

PASS THROUGH SLA – iBandwidth delivers the same SLA guarantees by Service Guide to the underlying providers you would be entitled to if negotiating directly.

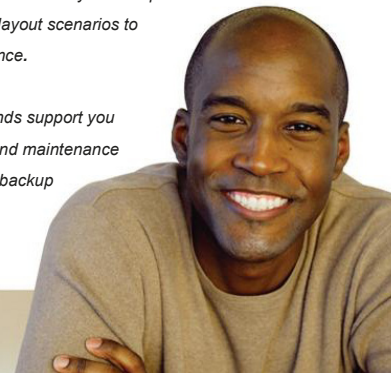

FULL AND PARTIAL RACK SPACE – You can lease rack space in full or partial increments, as your needs dictate.

POWER – Power is available in increments of 1 KW per ½ cabinet

DESIGN AND LAYOUT SUPPORT – Should you require guidance on rack layout and placement and space planning, iBandwidth's design team support can give you layout scenarios to implement that will minimize your footprint and maximize your presence.

REMOTE HANDS – iBandwidth can negotiate for you the remote hands support you need to maintain your servers in other markets, such as installation and maintenance support, cross-connects, re-bootsrack and stacks equipment builds, backup support, coordination with third party vendors, design and layout documentation and support, cable management, and more.

SECURITY AND DIVERSITY

Remote support at your fingertips

iBandwidth has negotiated advantageous agreements with some of the nation's largest and most well-respected data center management centers across the United States and in numerous countries around the world. These data centers provide all the power backup, fire detection and suppression equipment and controlled access programs you need to give you the peace of mind that your traffic is well guarded even if far from headquarters. Bandwidth also offers Remote Hands management including cross connects, testing and installation support at some of the most prestigious centers including 111 8 thAvenue and 60 Hudson in NYC , 56 Marietta in Atlanta, and 350 E. Cermak Street in Chicago, just to name a few. We also offer dark fiber access to some of the more prestigious facilities giving you cost effective virtual access to prime real estate, with low latency. We are also in more remote locations to offer you the support you need even in some of the less well traversed geographies.
